

# SRG

Service Resource Group International, LLC

*SRG personnel successfully deliver engineering, procurement, and construction solutions to our global clients. Our team executes projects under the most difficult conditions in the most challenging locations. We safely deliver projects and services on time and within budget.*

## PROCUREMENT

Understanding that material costs can be in excess of 50% of the total project cost and are a significant risk to the project schedule, SRG personnel have built a global network of vetted, trusted suppliers and logistics solutions to meet client objectives. Our team ensures delivery of critical items to projects in a timely manner, meeting project schedule and cost requirements.

Our procurement organization uses SRG's knowledge of industry tools and systems to access proven global suppliers and to provide clients with best value and compliant materials within schedule requirements. Our streamlined procurement and supply management process ensures projects finish on time and within budget, by reducing lead times, providing quality materials the first time, and improving inventory control and tracking, resulting in reduced client cost.

- Strategic Sourcing
- Materials Management
- Contract Management
- Logistics
- Export Compliance

## ENGINEERING

SRG provides Design, Design Management, and Independent Design Review services for a variety of projects.

Our team generates cost-effective and time-sensitive designs that mitigate costly construction issues, enabling projects to stay on track and within budget and schedule constraints. SRG engineers provide Design Management services, coordinating multi-disciplinary teams to ensure quality designs are submitted according to schedule requirements. We have partnered with discipline specific subject matter experts to conduct Independent Design Reviews at key project stages to ensure consistent, compliant design delivery.

- Design Management
- Independent Design Review

## PROJECT EXECUTION

SRG manages complex government, NGO, and commercial projects using our proven project delivery systems and personnel. Our best in class management staff has delivered projects for key military and government clients, IOCs, global mining corporations, and various other clients.

Our Project Controls team utilizes the latest Primavera software to develop integrated cost and resource loaded schedules, which gives project management staff and clients visibility to predict, understand, and constructively influence the time and cost outcomes of a project or program.

We provide Quality Management throughout the life of the project, from design quality reviews and document revision management to quality management during construction and hand-over. Our team delivers facilities that exceed client expectations.

SRG's Safety Program is equally as important as any other management component, including cost, schedule, and quality. Our HSE Management personnel and systems ensure that project activities are conducted in a safe, healthy, and environmentally and socially responsible manner, aimed at preventing incidents, injuries, illnesses, pollution, and damage to assets. Our safety focused, experienced team allows the client to deploy assets elsewhere.

Our knowledgeable project management staff understands secured facility access and base operations. Our team members have a record of operating successfully within base escort and security requirements to deliver on-time quality projects.

## SPECIALTY SERVICES

SRG performs Owner's Representative services for all types of global commercial projects including infrastructure, energy, mining, and vertical construction. We have assets deployed in the Middle East and Africa to interface with project team members, track issues, and expedite solutions. We serve our clients by acting as their exclusive agent throughout the planning, design, and construction phases, helping to ensure that quality, cost, and schedule objectives are met.

Our team has experience in identifying, analyzing, and preparing construction claims and disputes for construction and engineering projects worldwide. SRG can assist clients in assessing or validating entitlement and quantification of damages, promoting a successful resolution in an efficient and timely manner.

SRG's personnel have the proven knowledge, experience, and procedures in place to successfully navigate government issued design-build requests for proposal. We understand the requirements and client drivers for successful award. Our goal is to help you provide a fully compliant, fully executable proposal.

- Owner's Representation Services
- Claims Services
- Bid and Proposal Support

## GOVERNMENT/NGO

Our experienced team members have successfully completed large scale design-build projects worldwide for US Government clients such as USACE, NAVFAC, and AFCEE along with other agencies such as the Department of State. SRG's best in class personnel and proven systems can deliver UN and NGO projects in the harshest environments and in remote locations.

- MILCON
- FMS
- UN and NGOs

## INFRASTRUCTURE

SRG performs Engineering, Procurement, and Management Services on global infrastructure projects. We provide high-value infrastructure solutions for airports, bridges, highways, rail, and port facilities.

- Aviation
- Transportation
- Marine
- Power & Utilities

## ENERGY & MINING

SRG performs Engineering, Procurement, and Management Services for infrastructure segments of energy and mining projects. Our team also provides turn-key modular camps for remotely located projects.

- Roads
- Drainage
- Utilities
- Modular Camps

## COMMERCIAL

SRG performs Owner's Representative services for all types of commercial projects globally to include infrastructure, energy, mining, and vertical construction. We have assets deployed in the Middle East and Africa to interface with project team members, track issues, and expedite solutions. We serve our clients by acting as their exclusive agent throughout the planning, design, and construction phases, helping to ensure that quality, cost, and schedule objectives are met.

- Client Representation
- Property Condition Assessments
- Document Review and Tracking
- Budget Review
- Cost Review and Tracking
- Schedule Review and Tracking
- Design Review
- Construction Progress Monitoring
- Technical Subject Matter Expert Support
